

I pay XM Radio for the ability to listen to commercial-free music, news, weather, and traffic. Others choose to listen to over-the-air radio. Those who represent the commercial interests of the over-the-air radio media shouldn't be able to decide what I can and can't listen to since it would obviously be in their self-interests to limit my satellite radio choices as much as possible. I therefore respectfully urge the FCC to reject the NAB petition 04-160.

Sincerely,

Michael Bush
